J. R. Anderson  
Olin Corporation  
P.O. Box 2896  
Lake Charles, LA 70602

Dear Mr. Anderson:

We wish to obtain samples from the recently installed wells at your North Little Rock facility and ask your cooperation in providing site access. The date of sampling has not been firmly established, as analytical laboratory space is currently unavailable. However, we anticipate that by mid to late-July we will be prepared to conduct the referenced work. Due to the uncertainty in timing for this activity, Jairo Guevara will contact your office by telephone to finalize the details. We will be prepared to split samples with you, should you desire.

If you have further questions on this matter, please call me at 214/767-9704.

Sincerely yours,

James Mullins, 6AW-SE  
Environmental Engineer
